NATIONAL COLLEGE OF SCIENCE & TECHNOLOGY
Committed to Excellence

Educational Philosophy THE NCST SQUARE OF LEARNING

NCST provides holistic education programs which are anchored to our Square of Learning composed of Values Formation, Environmental Concern and Protection, Theoretical Foundation and Practical Skills Development. These four elements should work hand-in-hand order to attain the realization of unified NCST Spirit.

Values Formation.

Among the four elements, values formation was crafted to be the first and most important element of our education. We would like to inculcate to every NCST faculty member the importance of adopting positive attitude, competitiveness and excellence in every work. As we build the character of every individual and emphasize mutual respect, we put both our belief in transforming ordinary students to become extraordinary. Values Formation represents our Heart.

Environmental Concern and Protection

It is our common responsibility to give environmental consciousness, care and protection. We believe that we are all responsible and should take our place in the ecological balance and management, and be part of the solution instead of becoming the problem. We should inspire and influence our community in the implementation of our environment programs. Environmental Concern and Protection represents our Soul.

Theoretical Foundation

This element is the backbone of our educational philosophy. We would like to excel theoretically because it is the foundation of our knowledge where our wisdom depends. Theoretical Foundation represents our Mind.

Practical Skills

We continuously develop practical skill enhancement programs to sustain competitiveness among our graduates, creating an avenue of cooperation between the industry experts and the academic community in crafting a more relevant curriculum and more industry-relevant skills pertaining to the technical training requirements of our students. We should be able to learn the ability to use the technology with the use of our hands. Practical Skills represents our Body.

The Corporate Social Responsibility (CSR) wing of NCST that provide industry-based education using Dual Training System as a modality.

VISION

The National College of Science & Technology (NCST) systems envision to become one of the nation's leading industry-based educational institution with campuses in key areas around the Philippines. NCST will be a top choice for human resources of every industry.

NCST aims to become the institute for nation building, where student excellence is not an extraordinary achievement but a daily way of life. NCST, in response to the commercial and industrial sectors' need of highly professional and skilled manpower, provides advanced technology and industry-based education, and sets standard of proficiency and competency compatible to the demands of industry, enduring positive work values, competitiveness and quality among its graduates.

We aim to contribute to the national development by providing functional and relevant education thereby producing quality and responsible graduates with a strong foundation in character, faith, and love of country. Our graduates will become the change agents who will make a difference for this nation. We will produce professionals, leaders, entrepreneurs or skilled workforce who will become assets to the society and productive citizens of our country.

MISSION

NCST undertakes the responsibility of providing the country with quality graduates who are trained with industry-responsive knowledge and skills and founded with underpinning values of faith, love of country and humanity, hope, justice, mutual respect and peace. Our academic community accepts the challenge to work hard as a team in the spirit of excellence to ascertain that our vision and mission turn into glorious reality.

WE BELIEVE...

In alliances, constructive and synergistic, with all who share our vision and mission and without having to subvert our philosophy or compromise our principles.

In providing equal rights in the delivery of industry-based education regardless of race, color, creed and social status.

In building a holistic character of our graduates who are equipped with industry expertise embedded with industry responsive knowledge and developed with solidified values of faith, love of country and humanity, hope, justice, mutual respect and peace.

In every member's capabilities and strength, thus providing industry-academe immersion and cooperation as an avenue for continuing education and professional development for it is the integral component in giving quality service to our clientele.

WE PROFESS...

In the Almighty God, the Great Educator, the science of everything, whose blessings we implore in all our goals and aspirations, and in His Divine Will, we rest our vision.
